

# DÉVELOP PEMENT DURABLE

## SUSTAINABLE DEVELOPMENT

EMBELIA is committed into a **sustainable development** approach and pays attention to reducing the environmental impact of its packaging by offering refill packaging.

## REFILLABLE JARS

EMBELIA offers glass and plastic jars with a refillable inner cup and dedicated lids.

### GLASS JARS

#### REFILLABLE CANOPEE JAR, REMOVABLE INNER CUP AND LID

##### THE JAR

###### The raw material:

Glass type 3 re-usable and recyclable

Three options are possible:

- **A 90% recycled glass** (including 75 % PCR) green color.  
This recycled glass provides a natural protection against UV radiations (almost 99 %).
- **A 90% recycled glass** (including 60 % PCR) transparent color.
- **A traditional glass** perfectly transparent.

###### The capacity:

50 ml

##### THE INNER CUP

**The raw material:** white recyclable PP.

An aluminum cover can be sealed on the inner cup and provided upon request.

The inner cup can be removed and recharged easily by every user.

**The capacity:** 50 ml

##### THE LID

**The raw material:** re-usable and recyclable white PP

Many customizations are possible such as silk-screening on the jar, pad printing, hot stamping, coloration of the inner cup or the lid...

# SUSTAINABLE DEVELOPEMENT - REFILL

## PLASTIC JARS

Don't hesitate to contact your sales representative for any inquiry of glass bottles with a screw neck.

## DEFINITION OF THE DIFFERENT CONCEPTS

### RECYCLABLE :

A product is recyclable when, at the end of its life, it can be reintroduced into the production cycle to replace some part or all the new material that is normally used to manufacture a product.

### RECYCLED MATERIAL :

- 1- **PCR** (Post-consumer recycled): Material that is sorted after use by the consumer, to be used again in the production of new packaging.
  - 2- **PIR** (Postindustrial recycled): Material derived from industrial waste, to be used again in the production of new packaging.
- ⇒ These materials limit the use of non-renewable fossil resources.

### REFILLABLE OR REUSABLE :

A packaging is refillable or reusable when the consumer after the use of the product wash it and refill it to re-use it.
