| 120 ml | | Amber | R3/58* |  |

Glass is particularly well suited to the requirements of the pharmaceutical industry and offers a high-end positioning.

White glass is ideal for ensuring visibility of contents, while amber glass effectively protects sensitive products from UV rays.

The wide-opening design facilitates packaging and provides practicality in distribution.

LIDS

These 2 ranges have the advantage of being compatible with our GCMI necks

EXAMPLES OF SUITABLES LIDS

LID - WHITE POLYPRO -
